

State Collection Service Inc

Alvaria Motivate™ Case Study

Summary of Results

Agents, Supervisors, Business Managers and Executives were provided a transparent view of the production landscape. The Company Goals that were outlined by the organization were clear and their progress was easily tracked. Healthy competition through transparency was evident in Contests and Duels which instantly improved productivity and efficiency. Rewarding agents with the Auction mechanism to redeem prizes for points ensured that the value of point achievement remained high. Integrated Coaching allowed Supervisors to immediately engage Agents specifically related to their progress toward the highly visible Company Goals. Internal resources at State Collection were highly engaged in the platform which played a vital role in the success of agent and supervisor engagement. In summary utilizing Alvaria Motivate generated a significant increase in Immediate Pays for State Collection.

State Collection Service - Pilot Analysis

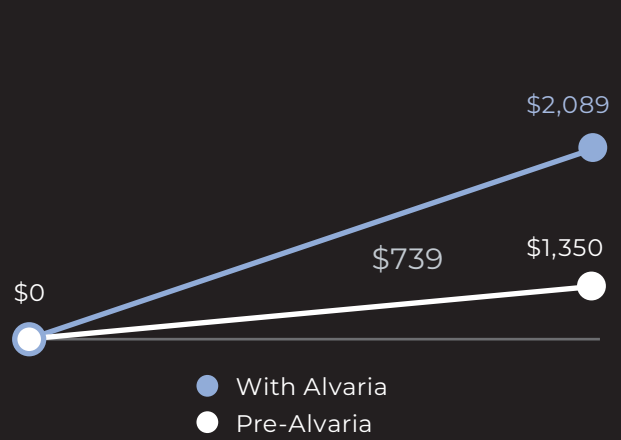

The pilot data for State Collection Service's use of Alvaria Motivate speaks for itself...

Agent AB	29	Agent AB	21
Agent TJ	28	Agent TJ	20

Opportunities

- Using coaching platform on Client A and Client B will increase agent engagement and productivity, during the Pilot there were “0” coaching events on those two campaigns.
- Successfully ran auctions on each campaign during the Pilot. To further engage agents to achieve spendable points for redemption we would recommend utilizing the Raffle or Egiftcard store to further promote that behavior.
- Expand Contest diversity and volume: Specifically run Team versus Team and User Defined Group versus User Defined Group. Incorporate Most Improved contests to target middle 60% of call center floor.

- Consider leveraging Duel Wagering, which has been released to State. This will promote additional motivational value from the competition game mechanic.
- Incorporate other sectors/locations into the game. Great opportunity to utilize Team Contests to galvanize belonging and togetherness.
- Review how goals are trending to ensure agents and supervisors remain challenged.
- If goals are being met consistently on some campaigns or the current goal isn't being utilized we should look at bringing in new goals that matter more to the executive team.
- Change the way the immediate pay goal is currently calculated into a more intelligent goal that accumulates by hour worked as opposed to total day goals. This could lead to less apathy at the agent level that may work less than a full eight-hour shift but still are expected to hit a full day's worth of the goal. As currently designed, agents who work less than an 8-hour shift have a greater chance to miss out on levelling.
- Add new leaderboards that focus on different metrics would keep the leaderboard fresh and exciting going forward.
- Utilize Noble TV Leaderboard to add additional motivation via peer recognition. Connect to API for less human interaction and more real time data points.

Additional Observations: Client C

- The average days worked increased 45% from the first four weeks of the pilot compared to the last two.
- State could consider adding a "failsafe" when an agent enters a large number that validates their entry to make sure they meant to enter it that way. There were a few occasions where an agent had an extra "0" on Immediate Pays.

And the results *of the complete study were even better...*
